

Prof. Hiroshi Takagi (NAIST, Japan) Talking about Yeast Genetic Engineering and Its Applications

Prof. Hiroshi Takagi, the Head of Laboratory of Applied Stress Microbiology of Nara Institute of Science and Technology (NAIST), Japan has just given a general lecture on Wednesday, Nov 2nd, 2016 at the Auditorium of Faculty of Mathematics and Natural Science (FMIPA), Dramaga Campus, Bogor Agricultural University. This lecture was hosted by [Dr. Rika Indri Astuti, M.Si](#) from the Department of Biology, FMIPA, IPB. About 200 participants (students and lectures) attended the lecture regarding the approaches of genetic engineering in yeast as well as its potential application in various fields, including food, energy, and medicines.
