Animal House

The animal house consists of several types of animals used for practical and research activities. Those animals are *Macaca fascicularis*, several species of turtles such as *Cuora amboinensis* and *Cyclemis dentata* , Mice (*Mus musculus*) and Bees (*Trigona* spp), and earthworm culture. Courses related to these animals are Vertebrates, Animal Physiology, Animal Behavior, Animal Observation Methods, and Experimental Behavior. Research related to these animals is mainly about behavior, such as foraging, memory, color perception and taste perception
