

## Inauguration of 2015 Biology Student Association

Inauguration member of Biology Student Association (HIMABIO) IPB 2015 was done by HIMABIO board council on February 14th, 2015 at RK. 0 Fak FMIPA IPB. The inauguration was attended by Dr. Berry Juliandi, M.Si as representatives of the Department of Biology IPB and the DPM of Science Faculty to certify new board of HIMABIO. In 2015, HIMABIO choose different name of cabinet from previous year. This year the cabinet name inspired from a bird called 'Albatros'. Albatros is a large sea birds live in the Antarctic Ocean and the North Pacific. These birds have a very large wingspan and has a good flying effectiveness, so it's inspired HIMABIO to take that name. In line with that philosophy, all of HIMABIO members need to work together and achieve the

goal with maximal effort. Each of the head of division was assigned to present their draft work program to be implemented within a period of 1 year. The event take place smoothly and finished earlier than the estimated schedule. We hope that all the work program goes well.
