

IPB PARE Spring School

(Adapted from [IPB website](#))

Bogor Agricultural University (IPB) together with Hokkaido University, Thammasat University, Chulalongkorn University, Kasetsart University, Universitas Gadjah Mada (UGM), and Institut Teknologi Bandung (ITB) had successfully held PARE (Population, Activities, Resources, and Environment) Spring School. Of 40 graduate students from Japan, China, Indonesia, and Thailand successfully completed the Spring School which lasted for two weeks (9-20 March 2015). Several graduated students were students of the Master Program of Microbiology. In this occasion, [Prof. Dr. Anja Meryandini MS.](#) attended as one of the guides of the program.

The theme of PARE Spring School this year was “Good Practices On Ecosystem Management To Improve Community Welfare and Environment Quality”. During the program, the participants of the Spring School took part in the classroom, the field visits to Kampung Baduy, Gunung Gede, Depok, and Pluit Reservoir to observe how the load faced by the river environment, from upstream to downstream. This Spring School would be continued with Summer School in Hokkaido University which would be held in the month of June 2015. The Spring School and the Summer School were parts of the package of the program of PARE.
